

Abbreviations

2D	2-dimensional
3D	3-dimensional
AMLPP	Approximate minimum-length pseudo-polygon; see Page 273
CAV	Cavity; see Page 102
CH	Convex hull; see Page 101
ESP	Euclidean shortest path; see Page 19
iff	Read: if and only if; see Page 14
MLA	Minimum-length arc; see Page 276
MLP	Minimum-length polygon; see Page 118, 229–231, 301
MLPP	Minimum-length pseudo-polygon; see Page 273
MPP	Minimum-perimeter polygon; see Page 115
RBA	Rubberband algorithm; see Page 63
RCH	Relative convex hull; see Page 120
SPM	Shortest path map; see Page 161
SRP	Safari route problem; see Page 345
TPP	Touring polygon problem; see Page 309
WRP	Watchman route problem; see Page 323
ZRP	Zookeeper route problem; see Page 345

Symbols

$ S $	Cardinality of set S
\parallel	Relation sign for being parallel
∂S	Frontier of set S
\wedge	Logical ‘and’
\vee	Logical ‘or’
\cap	Intersection of sets
\cup	Union of sets
pq	Straight line segment with endpoints p and q
pqr	Triangle with vertices p , q , and r
\triangle	Trapezoid or triangle (in a partitioning)
\overline{pq}	Straight line defined by points p and q ; orientation “from p to q ”
$\sphericalangle(pqr)$	Angle formed by rotating segment pq clockwise into segment qr
\square	End of a proof or of an example
a, b, c	Real numbers
$\mathcal{A}(\cdot)$	Area of a measurable set (as a function)
α, β	Angles
\mathbb{C}	Set of complex numbers $a + i \cdot b$, with $i = \sqrt{-1}$ and $a, b \in \mathbb{R}$
d_m	Minkowski metrics, for $m = 1, 2, \dots$ or $m = \infty$
d_e	Euclidean metric; note that $d_e = d_2$
D	Determinant; see Page 100
δ	Real number greater than zero
e	Edge (e.g. of a graph); real constant $e = \exp(1) \approx 2.7182818284$
E	Set of edges of a graph
ε	Real number greater than zero (the accuracy of an RBA)
ε_s	Real number greater than zero (a shift distance)
f, g, h	Functions, for example from \mathbb{N} into \mathbb{R}
g	Simple cube-curve
\mathbf{g}	Tube (i.e., the union of cubes) of a simple cube-curve g
F	Face of a polyhedron

\mathcal{F}	Set of faces of a polyhedron
G	Graph
\mathbb{G}	Set $\{\dots, -2, -1, 0, 1, 2, \dots\}$ of integers
γ	Curve in Euclidean space (e.g. straight line, polyline, smooth curve)
H	Half plane; see Page 99
i, j, k, l, m, n	Natural numbers
i	Number of iterations, e.g. in a rubberband algorithm
j	Natural number; index of points or vertices in a path
k	Natural number; total number of items
κ	Function in ε
L	Length (as a real number)
$\mathcal{L}(\cdot)$	Length of a rectifiable curve (as a function)
$l(\rho)$	Length of a path ρ
λ	Real number; e.g. between 0 and 1
n	Natural number; e.g. defining the complexity of the input
N	Neighbourhood (in the Euclidean topology, or in grids)
\mathbb{N}	Set $\{0, 1, 2, \dots\}$ of natural numbers
$\mathcal{O}(\cdot)$	Asymptotic upper time bound
p, q	Points in \mathbb{R}^2 or \mathbb{R}^3 , with coordinates x_p, y_p , or z_p
$p(x)$	Polynomial in x
$p.x, p_i.x$	x -coordinate of point p or point p_i
$p.y, p_i.y$	y -coordinate of point p or point p_i
$p.z, p_i.z$	z -coordinate of point p or point p_i
P	Polygon
P^\bullet, P°	Closure and topological interior of polygon P
π	Plane in \mathbb{R}^3 ; real constant $\pi = 4 \times \arctan(1) \approx 3.14159265358979$
Π	Polyhedron
Π^\bullet, Π°	Closure and topological interior of polyhedron Π
$\prod_{i=1}^k S_i$	Product of sets S_i
\mathcal{P}	Partitioning (of the plane or of a simple polygon)
r	Radius of a disk or sphere; point in \mathbb{R}^2 or \mathbb{R}^3
\mathbb{R}	Set of real numbers
ρ	Path with finite number of vertices; see Page 19
s	Point in \mathbb{R}^2 or \mathbb{R}^3
S, S_i	Sets
\mathcal{S}	Family of sets
t	Point in \mathbb{R}^2 or \mathbb{R}^3
T	Tree; threshold (a real number)
τ	Threshold (real number)
\mathcal{T}	Trapezoidation or triangulation (of the plane or of a simple polygon)

v	Vertex or node; a point in \mathbb{R}^2 or \mathbb{R}^3 , with coordinates x_v , y_v , or z_v
V	Set of vertices of a graph
$V(G), V(T)$	Set of vertices of graph G or tree T
$V(\rho)$	Set of vertices of a path ρ
vu, \overrightarrow{vu}	Undirected or directed line segment between points v and u
x	Real variable
\mathbf{x}	Vector
y	Real variable
\mathbf{y}	Vector
\mathbb{Z}	Set of integers
